ECONOMIC COMMISSION FOR LATIN AMERICA
Sixth Session
Bogota, Colombia

TRAINING OF PERSONNEL FOR PORTS

Draft resolution adopted by Committee III on 12 September 1955

THE ECONOMIC COMMISSION FOR LATIN AMERICA

CONSIDERING:

a) the secretariat study on Maritime Transport in South America
(document E/CN.12/369/Add.3);

b) that its conclusions bring to light cases of deficiencies in the
working methods, management and installations of Latin American ports,
which have a negative influence on the region's trade; and

BEARING IN MIND: the **beneficial** role that a programme of technical
assistance could play in this field;

RESOLVES:

To recommend to Latin American governments that, bearing in mind the
need to improve the condition of ports in the region, they consider the
suitability of requesting technical assistance for the training of
personnel in the management and operation of ports, mindful in addition
of the activities in this sphere being developed by the Inter-American
Economic and Social Council.
