ECONOMIC COMMISSION FOR LATIN AMERICA  
Third Session  
Montevideo, Uruguay

ADDITIONS PROPOSED TO THE AGENDA  
BY THE CUBAN DELEGATION

To add:

The desirability of maintaining foreign demand for our typical exports at the highest possible levels, in order not to increase the unemployment arising from the growth of the population, ensuring that the countries of the centre shall not encourage domestic production of those articles, nor stimulate competition in the exports of the peripheral countries.

To add:

The need to ensure domestic production of essential articles such as foodstuffs, textiles and medicines, in order to guarantee supplies to the native populations in the case of war or any situation arising from the balance of payments.
