ECONOMIC COMMISSION FOR LATIN AMERICA

Office for the Caribbean

PROPOSED AMENDMENTS TO THE ECCM  
COMMON EXTERNAL TARIFF

(Incorporating proposals submitted  
by the St. Lucia Statistical Office)

## INTRODUCTORY NOTE

ECLA has been closely involved with the Common External Tariff of the East Caribbean Common Market from the earliest stages and indeed, the Regional Trade Policy Expert attached to the Port of Spain Office was one of the main architects of the Tariff. Moreover, ECLA has a continuing interest and involvement in statistics in the Area and has been participating in the statistical work consequent on the introduction of the new tariff.

The ECCM Common External Tariff has been in effect for approximately one year in most member-countries. Experience has dictated that some amendments are necessary to improve the usefulness of the Tariff and to ensure that the requirements for statistical details by a variety of agencies and organizations including Governments are facilitated by including additional breakdowns. Certain typographical and other errors in the original tariff document also need correction.

The Comptrollers of Customs and the Statistical Officers of member-States have discussed the question separately and final proposals are to be prepared for submission to the ECCM Council of Ministers before the end of this year. In addition, at the Meeting of Statistical Officers of the ECCM countries held in Dominica on 28 September 1973 this office was requested to prepare a list of proposals for amending the ECCM Common External Tariff. The list was to include proposals made at that meeting as well as proposals which were to be submitted by Statistical Officers to the ECCM Secretariat by the middle of October 1973.

Accordingly, this document has been prepared for consideration by a Working Group consisting of the Chief Statistician, Antigua (UN Adviser in Statistics to Antigua), the ECCM Data Processing Adviser, the Manager of the Data Processing Centre in St. Vincent, and an ECLA representative. The document consequently contains tentative recommendations only which will be discussed by the Working Group before placing a final list of

proposals to the meeting dealing with the question of amendments to the Tariff, scheduled for 12 to 15 November 1973. The Working Group will also have to consider additional proposals of other Statistical Offices which have been received by the ECCM Secretariat.

SOME SPECIFIC CONSIDERATIONS TO BE TAKEN INTO ACCOUNT  
IN AMENDING THE ECCM COMMON EXTERNAL TARIFF

Listed below are certain items which require special consideration, and on which recommendations should be made by the Statistical Working Group:

1. Separation of baby food preparations included in tariff items 19.02, 19.05, 20.02, 20.05, 20.06, 21.05 and 21.07. The St. Lucia suggestion is that baby foods be entered free of duty in all except two cases, items 20.05 and 21.05. While the sub-division is not considered essential for statistical purposes (members may however decide otherwise) the duty recommendation necessitates bringing these to the attention of the meeting of Comptrollers dealing with the amendments;
2. Separation of containers included in tariff items 39.07, 73.40, 74.19, and 76.16. Here also the sub-divisions proposed are too detailed. Members are asked to consider whether in their opinion containers as shown in the St. Lucia proposal should be included.
3. Treatment of Parcel Post. St. Lucia recommends that "Parcel Post imports valued at over \$4.50 and less than \$29.50 be not classified according to kind". This means that these imports valued at \$29.50 and over would be given full customs treatment as if they were imports in the normal manner and classified to the appropriate tariff code. Goods valued below this level would not be classified according to kind but entered as parcel post. The only objection here is the setting of two levels. All that is necessary is the level above which goods will be treated as regular imports. The Working

Group should recommend if \$29.50 is an appropriate level. It is also necessary to consider treatment of Parcel Post exports. The general practice seems to be that parcel post exports are not classified according to kind, but while some countries include these in the trade statistics as "parcel post" others exclude them entirely. It is recommended that exports and imports be accorded the same treatment. Consideration must be given as to whether or not these should be included in the trade statistics. There is also the question of the classification codes. The SITC (Revised) has a category 911.0 "Postal Packages not classified according to kind". Obviously, this has no equivalent BTN number. For processing purposes, a tariff number would be desirable and a code such as 100.01 would seem to be appropriate.

4. Special transactions. St. Lucia recommends that "these transactions are of sufficient significance volume and value wise to warrant classification to kind".

It is considered that some of these shipments which include personal and household effects of travellers and migrants and samples temporarily imported or exported, are likely to be so varied as to present difficulty to Customs Departments in classifying accordingly to kind. We would therefore suggest using the SITC Item No. 931.0. "Special transactions not classified according to kind" and a corresponding tariff number such as 100.09. A breakdown such as that employed by Trinidad and Tobago may also prove useful, that is:

<u>Tariff Code</u>	<u>Statistics Code</u>	<u>Description</u>
99.99.02	931.01	Personal effects of travellers.
99.99.03	931.02	Household effects of travellers.
99.99.04	931.03	Samples temporarily imported or exported.
99.99.05	931.04	Films on loans or lease for periods of three months or less.
99.99.06	931.05	Goods returned to the country from whence exported.
99.99.99	931.99	Other special cases.

It must be remembered that these special transactions though they increase or decrease the material stock of resources in a country, are not "economic transactions goods" as is the case with imports and exports in the normal sense.
