## FOREWORD

In a global climate of increasing importance and reliance on information and sets of statistical data, it is necessary for the Caribbean subregion to continue its recognition of the valuable role of statistics in policy formulation. The Economic Commission for Latin America and the Caribbean (ECLAC) Subregional Headquarters for the Caribbean/secretariat for the Caribbean Development and Cooperation Committee (CDCC) is pleased to present this document, published annually, which provides an overview of statistical publications produced by the subregion.

The document maintains its original format, listing each main statistical document, its publisher, ISSN document reference, the periodicity of its publication and an abstract of the contents. While for the most part, document names have not changed since the previous volume of this publication, there have been some name changes and discontinuations. These cases have been clearly indicated.

We wish to announce that this document now appears on the ECLAC/CDCC Homepage on the World Wide Web ([www.eclacpos.org](http://www.eclacpos.org)).

It is hoped that this document will continue to provide the researcher with a single source of information on Caribbean statistics and support the formulation of policy in member states.
