

Regional Workshop on REDATAM+SP xPlan/ WebServer Applications Development for Data Dissemination
2 – 12 August 2011, Saint Lucia

WEEK1

TIME	Tuesday, 2	Wednesday, 3	Thursday, 4	Friday, 5	Saturday, 6								
09:00	Welcome and opening remarks	OIC	Introduction to Create - Migration from different sources to Redatam	SM	SPSS example	SM	Introduction to xPlan	US	Functional nodes: CRUZ	SM			
	Feature address	ES									DBF example	Demonstration of a sample application	
	Introduction of participants and housekeeping												Design of the thematic structure for the application to be created during the workshop
	Introduction to the R+SP family of products	SM											
10:30	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break								
11:00	Introduction to Process module	US	Individual practice in database creation - DBF		Individual practice in database creation - SPSS		Configuration of nodes	LA	Crosstabs options	SM			
	Redatam database structure	LA									Good practices in application creation		
13:00	Lunch break	Lunch break	Lunch break	Lunch break	Lunch break								
14:30	Basic tabulations: Frequencies, Crosstab, Average, Median, Count, Arealist	SM	CsPro example	LA	Individual practice in database creation with own databases		Creation of the thematic structure	LA	Functional nodes: AVERAGE/MEDIAN	US			
											Use of general sections		
											Definition of selections Definition of the database		
16:00	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break								
16:30	Geographic selections	US	Individual practice in database creation - CsPro		Individual work in database creation with own databases		Functional nodes: FREQ	US	Maps in Redatam - Creation of a map composition	US			

WEEK 2

TIME	Monday, 8	Tuesday, 9	Wednesday, 10	Thursday, 11	Friday, 12					
09:00	Basics in database processing	SM	Add variables to INL	LA	Introduction of Front page creation	US	Introduction to WebServer application creation	SM	Style adjustments in web	US
	Programming in REDATAM		Functional nodes: QTS	SM	Initial windows	US	Web configuration - local server - apache Server structure	LA	Display of new buttons	
	Command editor and assistants RUNDEF command				Insert documents					
10:30	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break					
11:00	TABLE command	US	Functional nodes: FRACTION	US	Front page creation	US	Moving xPlan to WebServer	LA	Style adjustments	US
	Use of UNIVERSE						Modifications to the INL file			
13:00	Lunch break	Lunch break	Lunch break	Lunch break	Lunch break					
14:30	DEFINE command	SM	PREFERENCES section	LA	Individual work on the own database		Optimization of applications	LA	Individual work on the own database	
	Add additional variables to a database		GRAPHS				Selection of outputs			
			FOOTNOTES, PAGES				Map adjustments			
16:00	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break	Coffee/tea break					
16:30	Functional nodes: AREALIST	US	Parameters, window position, colours, source	SM	Installer generation (CD with Setup) LA	LA	Insert help files	SM	Closure	

Abbreviations:

OIC- Officer-in-Charge (ECLAC)

ES - Edwin St. Catherine

LA - Lenin Aguinaga

US - Ulla Suulamo

SM - Sinovia Moonie
