Eighth meeting of the Executive Committee of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean

Santo Domingo, 22 to 24 October 2008

REPORT ON THE ACTIVITIES RELATING TO THE PROGRAMME OF WORK ON THE DISSEMINATION OF THE EUROPEAN STATISTICS CODE OF PRACTICE IN LATIN AMERICA AND THE CARIBBEAN*

^{*} This report was prepared by the Statistical Office of the European Communities (EUROSTAT) and the Economic Commission for Latin America and the Caribbean (ECLAC).

A. BACKGROUND

The fourth meeting of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean (ECLAC) welcomed the initiative by a number of countries to take action in the region to promote awareness and use of the European Statistics Code of Practice, bearing in mind the situation in each country, and requested the Statistical Office of the European Communities (EUROSTAT) and ECLAC to prepare a programme of action to implement this initiative. The aim of the initiative is to establish a frame of reference for good statistical practices that are considered appropriate for the Latin American and Caribbean region and to encourage its adoption, especially in terms of the institutional and organizational environment of national statistical offices, in accordance with the specific reality of each country, on the basis of the following principles: professional independence, mandate for data collection, adequacy of resources, quality commitment, statistical confidentiality, impartiality and objectivity. The seventh meeting of the Executive Committee of the Statistical Conference of the Americas of ECLAC took note of the joint report prepared by EUROSTAT and ECLAC and approved the proposed programme of work, which consists in:

- (a) Creation of a task force made up of experts from countries interested in participating in this activity;
- (b) Preparation of a self-evaluation questionnaire for the countries on principles 1 to 6 of the European Statistics Code of Practice, indicators and their application;
- (c) Preparation of a document for participating countries on the results of the questionnaire on the application of the principles, in which the strengths and weaknesses are identified;
- (d) Organization of a workshop relating to the application of the principles on institutional factors with a view to analysing the European experience and discussing the results of the self-evaluation exercise. The workshop is intended for the task force, European countries proposed by EUROSTAT and members of the Conference that express an interest in participating;
- (e) Preparation of a support project for the implementation of best practices in the area of institutional factors in countries that wish to receive technical assistance in this field from experts from the European Union, ECLAC and member countries of the Conference;
- (f) Raising funds to finance the above-mentioned programme;
- (g) Discussion and approval of the proposed programme of work at the fifth meeting of the Statistical Conference of the Americas.

See the Report of the fourth meeting of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean (LC/L.2795), Santiago, Chile, 9 October 2007.

Principles 1 to 6, Implementation of the European Statistics Code of Practice. Document prepared for the seminar Institution-Building in National Statistical Offices: Credibility and Autonomy (DDR/8), 12 July 2008. See also the Report of the seventh meeting of the Executive Committee of the Statistical Conference of the Americas of ECLAC (LC/L.2870), 28 February 2008.

To date, items (a) and (b) of the programme have already been implemented and item (c) is currently being implemented. A working group was set up with representatives from Colombia, Mexico, Panama, Paraguay, EUROSTAT and ECLAC, and its main task was to examine the questionnaire used in European Union countries to assess the implementation of the European Statistics Code of Practice and produce a version suited to the situation of Latin American and Caribbean countries. That version of the questionnaire is attached to the present report as an annex.

The next phase was the self-assessment questionnaire and the drafting of a report on the results of applying the principles, in which the strengths and weaknesses in each area analysed are identified. The working group considered that, before moving on to the self-assessment questionnaire in all countries, it was necessary to carry out a pilot experiment in selected countries to identify any possible difficulties they might have in replying to the questions. The following countries were asked to take part in the pilot experiment: Colombia, Dominican Republic, Honduras, Mexico, Panama, Paraguay and Uruguay. The results of the experiment will be used to produce a new version of the questionnaire, which the countries of the region will be asked to complete for the purposes of self-assessment. EUROSTAT and ECLAC will present an oral progress report on the pilot experiment to the Executive Committee.

B. SELF-ASSESSMENT QUESTIONNAIRE FOR NATIONAL STATISTICS OFFICES ABOUT THEIR INSTITUTIONAL ENVIRONMENT

(June 2008)

The aim of this questionnaire is to find out the state of the institutional environment in which **national statistical offices** carry out their activities. This initiative is in response to the mandate issued at the fourth meeting of the Statistical Conference of the Americas of ECLAC to promote regional knowledge and debate on the adaptation of the European Statistics Code of Practice to the situation of each country.

| 7) | Date: |
| Whe | Choose one reply only for each question, except those where several responses are possible on a question states "please specify" try to be brief and precise |

PRINCIPLE 1: PROFESSIONAL INDEPENDENCE

(a) YES

(b) NO 🗌

The professional independence of statistical authorities from other government, regulatory and administrative departments and bodies, as well as from private sector operators, ensures the credibility of a country's official statistics.

| | Indicator 1.1 : The independence of the statistical authority from political and other external interference in producing and disseminating official statistics is specified in law. | | | | | | | |
|-----|---|--|---|--|--|--|--|--|
| 1. | Does the legislation in your country provide for the independence of the statistical authority from political and other external interference in the production and dissemination of official statistics? | | | | | | | |
| | (a) YES | (b) NO 🗌 | | | | | | |
| | | nment authorities and public admin | athority is such that he or she has access to istrative bodies. He/she must be a person | | | | | |
| 2. | Is the status of the h | ead of the statistical office comparal | ble to that of: | | | | | |
| (| (a) a minister or senior political position)? | (b) a high-ranking (non-political) civil servant? | (c) another authority? Please specify: | | | | | |
| 3. | The head of the stat | istical authority is appointed by: | | | | | | |
| (a) | the President/Prime Minister | (b) the President/Prime Minister with the agreement of Congress/Parliament | (c) another authority Please specify: | | | | | |
| 4. | Is the head of the sta | atistical authority appointed on the b | asis of a public competition? | | | | | |
| | (a) YES | (b) NO | | | | | | |
| 5. | Is the head of the sta | atistical authority appointed under a | fixed-term contract? | | | | | |
| | | | | | | | | |

| 6. | If so, is the contract r | ntract renewable? | | | | | |
|-----|---|-------------------------------|--|-------------------|--|--|--|
| | (a) YES | (b) NO 🗌 | | | | | |
| 7. | If so, have the last stipulated in their cor | | tical authority completed their ter | ms of office as | | | |
| | (a) YES | (b) NO | | | | | |
| 8. | If not, please specify | below. | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| 9. | Are the procedures for legislation and/or reg | | ract of the head of the statistical aut | hority set out in | | | |
| | (a) YES | (b) NO | | | | | |
| | | ve responsibility for er | uthority and, where appropriate, to a suring that official statistics are | | | | |
| | statistical bodies have | | uthority and, where appropriate, to deciding on statistical methods satistical releases. | | | | |
| 10. | Is the content of statis | stical press releases subject | ct to ministerial approval? | | | | |
| | | | | | | | |
| | (a) Always | (b) Sometimes | (c) Never | | | | |
| 11. | Is the timing of statis | tical press releases subjec | t to ministerial approval? | | | | |
| | | | | | | | |
| | (a) Always | (b) Sometimes | (c) Never | | | | |

| 12. | Is the choice of statistical methods, standards and procedures subject to ministerial approval? |
|-----|---|
| | (a) Always (b) Sometimes (c) Never |
| | Indicator 1.5 : The statistical work programmes are published and periodic reports describe progress made. |
| 13. | Does your organisation have a statistical work programme? |
| | (a) YES (b) NO (|
| 14. | If so, is the statistical work programme made public? |
| | (a) YES (b) NO (|
| 15. | Is the progress report on the statistical work programme made public? |
| | (a) YES (b) NO (|
| | Indicator 1.6 : Statistical releases are clearly distinguished and issued separately from statement or interpretations by government authorities relating to published statistics. |
| 16. | Are statistical releases (that is, press releases, reports or others) clearly identified as outputs of the statistical authority |
| | (a) YES (b) NO (Skip to question 18) |
| 17. | If so, how can statistical products be recognised? |
| | (a) Logo (b) Design (b) Copyright (c) Other Please specify: |
| 18. | Are statistical releases issued separately from political statements or interpretations by government authorities relating to published statistics? |
| | (a) Always (b) Sometimes (c) Never |

| | Indicator 1.7: The statistical authority, w matters, including criticisms and misuses of | | nts publicly on statistical | | |
|-------------------------------------|--|--|---|--|--|
| 19. | As the statistical authority, is it your specific cases of: | e policy to intervene public | cly on statistical issues, in | | |
| | a) Criticism of official statistics: | YES 🗌 | NO 🗌 | | |
| | b) Misuses of official statistics: | YES 🗌 | NO 🗆 | | |
| | c) Misinterpretation of official statistics: | YES 🗌 | NO 🗌 | | |
| 20. | If so, please state briefly the policy: | | | | |
| | | | | | |
| | | | | | |
