for the

(ECCM)

GENERAL NOTES

Obligations resulting from Customs Union and Free Trade Area obligations.

1. The ECCM Tariff is a Common External Tariff of the Customs Union formed by Antigua, Dominica, Grenada, Montserrat, St.Kitts, St.Lucia and St.Vincent, the trade amongst which countries can be carried out free from all duties.
2. Due to the fact that all the ECCM countries are members of the CARIFTA, equally the imports from the other CARIFTA countries (Barbados, Guyana, Jamaica and Trinidad and Tobago) are duty-free unless special provisions of the CARIFTA Agreement necessitate a special treatment. The items affected are marked in the Tariff*.

The Tariff Nomenclature and the interpretations of the Tariff items.

3. The ECCM Tariff is based on the Brussels Tariff Nomenclature.
4. It consists of the main Tariff Numbers which are in conformity with the BTN. Where necessary the main Tariff Numbers are broken down in Sub-Items. These have been introduced to deal with regional requirements.
5. The Tariff Numbers are to be interpreted according to Rules for the Interpretation of the Nomenclature, the Section and Chapter Notes and the Headings which form part of this Law. Further indication concerning their interpretation may be found in the Explanatory Notes and the Alphabetical Index which are made available by the Brussels Co-operation Council and which are the result of international action.

* These notes (including this footnote) are informative only and are not part of this Law.

Common and Special Duties

6. The duties normally applied by the ECCM countries on imports from third (i.e. non-ECCM and non-CARIFTA) countries are shown in this Tariff in the column "Duties". This column is, however, headed "Common Duties" wherever it is necessary to distinguish them from Special Duties.
7. In the case of a limited number of items individual ECCM countries have been granted the right to apply for a certain period duties which differ from the general ECCM rates. These rates are shown against the name of the ECCM country in question in a separate column "Special Duties". These countries are, however, not obliged to use under all circumstances the Special Duties but they may also apply the relevant "General Duties" or any other rate between the two. It is to be noted that for the countries not specifically mentioned the Common Duties apply.

Duties applied on imports from preferential and non-preferential areas

8. Both columns (Common and Special Duties) are sub-divided in General and Preferential Duties.
9. The sub-column "General Duties" abbreviated "Gen") contains the rates applicable to the imports from all countries which do not enjoy preferential treatment.
10. The sub-column "Preferential Rates" (abbreviated "Pref") contains the rates applied to imports from the countries to which the ECCM Governments decide to extend preferential treatment.

Provisions which do not form part of this Law

11. All references under the last column "Amount to be Declared for Statistics" are informative only and are not part of the ECCM Tariff. Consequently, if necessary, the statistical offices may without requesting a change of the Tariff Law ask for additional statistical information, in agreement with the Comptroller of Customs.

RULES FOR THE INTERPRETATION OF THE NOMENCLATURE

Interpretation of the Nomenclature shall be governed by the following principles:

1. - The titles of Sections, Chapters and sub-Chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions.
2. - Any reference in heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as imported, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or failing to be classified as complete or finished by virtue of this Rule), imported unassembled or disassembled.

Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.

3. - When for any reason, goods are prima facie, classifiable under two or more headings, classification shall be effected as follows:
 - (a) The heading which provides the most specific description shall be preferred to headings providing a more general description.
 - (b) Mixtures and composite goods which consist of different materials or are made up of different components and which cannot be classified by reference to 3(a) shall be classified as if they consisted of the material or component which gives the goods their essential character, insofar as this criterion is applicable.
 - (c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which involves the highest rate of duty.
4. - Goods not falling within any heading of the Nomenclature shall be classified under the heading appropriate to the goods to which they are most akin.
