

INTERNATIONAL TRADE IN GOODS IN LATIN AMERICA AND THE CARIBBEAN

International Trade and Integration Division, ECLAC – www.eclac.org/comercio

BULLETIN NUMBER 18

FIRST QUARTER 2015

Key Findings

- In 2014, Latin America and Caribbean (LAC) exports reached 1075 billion US\$ and the imports 1105 billion US\$. Consequently, the trade balance in the region was negative by 30 billion US\$. Thereby, the region registered a trade deficit the second year in a row. This is due, mainly, to the lower surplus in Argentina, Chile, and the Bolivarian Republic of Venezuela, the accumulation of nearly 4 billion US\$ deficit in Brazil, and the growing deficits shown by Colombia and Peru (see Table 1a).
- After consecutive falls in the first three quarters of 2014, exports in region for the complete year fell by 2.1%. Meanwhile, imports also declined by 0.6%.
- Nicaragua (+8.3%), Guatemala (+8.0%), The Plurinational State of Bolivia (+11.9%), and Colombia (+7.9%) were the countries with the largest annual increase in their exports in 2014, while Argentina, the Bolivarian Republic of Venezuela, and Brazil registered the largest decreases (-11.9%, -7.3%, and -7.0%, respectively).
- Among the sub-regional integration schemes, the exports of CARICOM (-8.2%), MERCOSUR (-7.6%), and the Andean Community (-4.3%) decreased, while those of the Central American Common Market (CACM) increased by 2.1% (see Table 1a).
- In terms of imports, the highest growth rates were registered for the Plurinational State of Bolivia (+11.9%) and Colombia (+7.9%). Further countries that increased its foreign purchases were Panama (+5.2%), Mexico (+4.9%), Nicaragua (+4.5%), and Guatemala (+4.4%). At the opposite end were Cuba (-11.7%), Argentina (-11.4%), Chile (-8.9%), Peru (-7.7%), and Brazil (-4.4%). Among the sub-regional integration schemes, the purchases of the Andean Community (+2.0%) and CACM (+1.2%) increased, while at the same time those of MERCOSUR and CARICOM decreased by 5.1% and 4%, respectively (see Table 1a).
- The decline in this year's exports comes with two years of continuous contraction. However, it is noted that the development is different in Mexico and Central America, which in 2014 experienced an increase in export value (see Figure 1a).
- The decrease in the region's exports was due to a 7.3% reduction in prices that could not be set off by a 5.2% increase in export volume. In 2014, the only sub-region that experienced an increase in prices was Central America. The remaining sub-regions registered decreases in prices with the most notable being in the Caribbean countries and those of the Andean Community. In contrast, all sub-regions including Chile and Mexico could increase their export volume, except the CACM, whose situation is opposite (see Figure 1b).
- The decrease in Latin America and the Caribbean exports in 2014 contrasts with the 1.1% increase in global exports. Likewise, the exports of the Asia, the United States, and the euro area increased by 4.0%, 2.8%, and 1.9%, respectively, while those of Africa and the Middle East fell by 3.1% (see Table 2).
- The intra-regional trade in 2014 declined by 8.2% with the respect to 2013. If Mexico is excluded, the drop is even 8.3% (see Table 4).

Source: ECLAC based on data from Statistical Offices, Central Banks, Export Promotion Agencies, the United States International Trade Commission (USITC), EUROSTAT of the European Union, Statistics Canada, the International Monetary Fund Direction of Trade Statistics (DOTS), and the Central American Monetary Council.

Notes: Data for the Bolivarian Republic of Venezuela beginning in January 2014 are estimated based on mirror statistics from its main trading partners; for the period July-December 2014, the monthly DOTS trends are applied. Data for Cuba and the CARICOM countries are estimated based on mirror statistics. Data for Honduras and Nicaragua do not include *maquila*. Data for the Dominican Republic for May 2014 are estimated. MERCOSUR data include the Bolivarian Republic of Venezuela and those of CACM include Panama.

Figure 1. Latin America and the Caribbean: Trends in Exports, January - December 2014

a) Change compared to previous year (in percentages) b) Decomposition of growth in price and volume compared to previous year (in percentages)

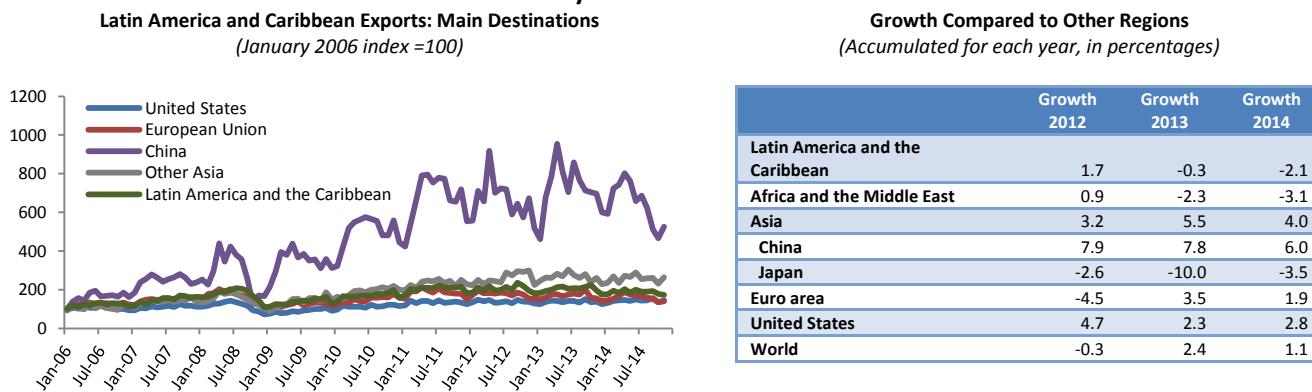

Source: ECLAC based on data from Statistical Offices, Central Banks, Export Promotion Agencies, USITC, EUROSTAT, and DOTS.

Notes: Data for the Bolivarian Republic of Venezuela beginning in January 2014 are estimated based on mirror statistics from its main trading partners; for the period July-December 2014, the monthly DOTS trends are applied. Data for countries in the Caribbean (Cuba and CARICOM) are estimated based on mirror statistics. Cuba's deflator is built based on the volume imported by the European Union; the Caribbean's deflator is built based on the deflators reported by Guyana and Jamaica to the IMF. CACM data do not include Panama; they also do not include *maquila* for Honduras and Nicaragua. MERCOSUR data include the Bolivarian Republic of Venezuela.

The negative growth rate of the region's exports in 2014 contrasts with the global increase in exports. Among world regions, only Africa and the Middle East registered a larger decline than that of Latin America and the Caribbean (see Table 2 and Figure 2).

Figure 2 and Table 2. Latin America and the Caribbean and Selected Regions: Trends in Value of Exports, January 2006 - December 2014

Source: ECLAC based on data from Statistical Offices, Central Banks, Export Promotion Agencies, USITC, EUROSTAT, Statistics Canada, DOTS, and CPB Netherlands Bureau for Economic Policy Analysis.

Notes: Data for the Bolivarian Republic of Venezuela beginning in October 2013 are estimated based on mirror statistics from its main trading partners; for the period July-December 2014, the monthly DOTS trends are applied. Data for Cuba and CARICOM are estimated based on mirror statistics. Figure 2 does not include Panama and the Dominican Republic; it does also not include *maquila* for Honduras and Nicaragua.

In 2014, the main export destinations of Latin America and the Caribbean were the United States (41.9%), Asia (18.0%), and the region itself (17.9%). As regards imports, the United States also were the main source (30.9%), followed by Asia (27.1%) and the region itself (17.5%) (see Table 3).

Source: ECLAC based on data from Statistical Offices, Central Banks, Export Promotion Agencies, USITC, EUROSTAT, Statistics Canada, and DOTS.

Notes: Includes data from Argentina, the Plurinational State of Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Paraguay, Peru, Uruguay, the Bolivarian Republic of Venezuela, and CARICOM. It does not include *maquila* for Honduras and Nicaragua. Data for Cuba and CARICOM are estimated based on mirror statistics of the United States, the European Union, Canada, and the rest of Latin America. In the case of the Bolivarian Republic of Venezuela, the total was disaggregated utilizing mirror statistics from the United States, the European Union, Japan, Chile, the rest of the MERCOSUR countries, the Andean Community, Mexico, Costa Rica, Guatemala, and Nicaragua; DOTS structure was used for the rest of the destinations.

The intra-regional exports in 2014 decreased by 8.2%. Likewise, those to Asia and the European Union decreased by 7.3% and 6.3%, respectively. Meanwhile, exports to the United States increased by 3.2%. At the imports side, the greatest dynamic is observed in those coming from the United States (+1.6%) and Asia (+0.5), particularly from China (+1.7%).

Note: It does not include *maquila* for Honduras and Nicaragua. MERCOSUR data include the Bolivarian Republic of Venezuela.

^a Growth rates with respect to the same period of the previous year.

In 2014, the largest share of intra-regional trade was observed in the Central American Common Market (24.2%), the only sub-region whose coefficient lay above the aggregated one for whole Latin America and the Caribbean (17.9%). The Andean Community (CAN) remains the grouping with the lowest coefficient of intra-subregional trade (7.4%). Moreover, the negative growth recorded for the exports of Chile and Mexico to the region (-2.3% and -7.6%, respectively) and for the intra-MERCOSUR (-12.7%) and intra-CAN trade (-2.4%) should be highlighted (see Table 4).

Source: ECLAC based on data from Statistical Offices, Central Banks, Export Promotion Agencies, USITC, and EUROSTAT.

Note: Includes data from Argentina, the Plurinational State of Bolivia, Brazil, Chile, Colombia, Costa Rica, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, the Dominican Republic, Uruguay, and the Bolivarian Republic of Venezuela. It does not include *maquila* for Honduras and Nicaragua. Data for the Bolivarian Republic of Venezuela beginning in October 2013 are estimated based on mirror statistics from its main trading partners that were assumed to have repeating shares in the same category in the same month of the previous year; for the period July-December 2014, the monthly DOTS trends are applied.

By product categories, the largest changes in 2014 with respect to the previous year were registered in the exports of mining and petroleum (6.2% decrease) and, to a lesser extent, of agricultural and livestock products (1.4% drop). Meanwhile, the exports of manufactured goods that alone accounted for 58.6% of total exports in 2014 had zero growth.

The decline in export value can be mainly explained by the change in minerals and oil prices, which together represent about 37% of the total exports. Likewise, the Latin American commodities price index fell by 8.3% (see Table 6.b), with declines in products such as gas, iron, copper, sugar, and soy. In terms of export volume, the heavy losses in gas, meat, sugar, and oil must be acknowledged, as well as the reported increase in exported iron (see Table 6a).

Source: ECLAC based on data from Statistical Offices, Central Banks, Export Promotion Agencies, CEPALSTAT and the World Bank. See description in the Excel spreadsheet in the Annex.

Notes: Product statistics are made up by main exporters in the region and not with all countries; in each case, they represent more than 70% of the annual total in that product. In the case of prices, it is an index calculated by ECLAC.

(A) Average of coffee, tea, and yerba mate; (B) Made up of iron and steel manufactures; (C) Soy grains; (D) Weight of each product in the total regional exports; (E) Weight of each group in natural resources and manufacturing exports in the region.
