THE ECONOMIC COMMISSION FOR LATIN AMERICA
Sixth Session
Bogota, Colombia

DRAFT RESOLUTION ON EMPLOYMENT DATA

Adopted by Committee I on 10 September 1955

THE ECONOMIC COMMISSION FOR LATIN AMERICA,

CONSCIOUS that employment problems in the Latin American countries have been inadequately explored and that they represent a fundamental element in guiding the economic policy of governments in their plans for economic development,

RECOMMENDS to Latin American Governments that, bearing in mind the studies undertaken by the International Labour Organisation and other specialized agencies, the necessary facilities be established or amplified for systematic data and timely information on employment in their respective countries, which the secretariat may include in its periodic analyses of the economic situation in Latin America.
