ECONOMIC COMMISSION FOR LATIN AMERICA

First session

WORLD ECONOMIC REHABILITATION

Resolution of 24 June 1948

THE ECONOMIC COMMISSION FOR LATIN AMERICA

CONSIDERING the close economic ties between reconstruction problems in the devastated regions and the problems of agricultural and industrial development of under-developed regions, which have been stressed by the Second Committee of the General Assembly of the United Nations during its Second Session; and

That the economic recovery of Europe and Asia may be of particular importance for the maintenance and development of economic and commercial activities in Latin America;

RESOLVES to instruct the Executive Secretary to make, in full co-operation with the Specialized Agencies, and with other inter-governmental organizations concerned, and within the limits of available resources, a study analyzing the relationship between the economic rehabilitation of non-American countries and the development of economic and commercial activities in Latin America, as well as the effects of this relationship.
