I. PRELIMINARY PROPOSAL FOR DISCUSSION OF ECLAC PROGRAMME OF ACTION FOR WOMEN IN LATIN AMERICA AND THE CARIBBEAN 1995-2015

A. BACKGROUND FOR DISCUSSION

1. Major meetings of 1975-1995 period and their recommendations. World Conferences (Mexico 1975, Copenhagen 1980, Nairobi 1985); Regional Conferences (Havana 1977, Macuto, Venezuela 1979, Mexico 1983, Havana 1984, Guatemala 1988, Curaçao 1991).
2. Existing instruments.
World Plan of Action (Mexico 1975), Programme of Action for the Second Half of the Decade (Copenhagen 1980), Nairobi Forward-looking Strategies for the Advancement of Women (Nairobi 1985), Regional Plan of Action for the Integration of Women into the Economic and Social Development of Latin America (Havana 1977); resolutions of the General Assembly and the Economic and Social Council; Convention on the Elimination of All Forms of Discrimination against Women.
3. Main activities being carried out by the United Nations system (see annex).
4. Analysis of achievements. (Base the analysis on the three themes of the Decade: Equality, Development and Peace —and, under each one, consider impact of the achievements on all women, or on certain groups of women.)
 - a. Achievements that have benefited all women, regardless of their socio-economic status. (For example: legal rights, mass access to education, access to employment, higher profile of a more active role in society for women, formal acceptance of the theme of women, institutionalization of the theme, emergence of new themes such as domestic violence.)
 - b. Achievements that have benefited certain women. (For example: access to higher education, access to better paid jobs, greater political participation.)
5. Analysis of obstacles. (As with the analysis of the achievements, the framework for this analysis should be the subthemes of the Decade and the socio-economic situation of women.)
 - a. Difficulties in incorporating the gender variable into global themes.
 - b. Lack of continuity in women-oriented programmes and activities.

- c. Obstacles attributable to cultural and religious mores, rooted in custom, that prevent the full integration of women.
 - d. Lingering stereotypes in formal and informal education on the woman's role in society.
 - e. Persistence of legal discrimination, especially with respect to personal and financial independence, rights within the family, in relation to children and to reproduction.
 - f. Persistently high rates of illiteracy, especially among women in rural areas.
6. New themes that have emerged during the period and are not yet addressed in existing instruments.
- a. The new international, regional scene, new proposals, the incorporation of the gender variable into new global themes.
 - b. New specific themes (women and violence, feminization of poverty...).

B. MINIMUM OBJECTIVES OF A PROGRAMME OF ACTION 1995-2015

1. GENERAL OBJECTIVES

- a. To consolidate the achievements of the period 1975- 1995.
- b. To promote and effect further changes necessary to attain genuine social equity for women in the region.
- c. To propose activities at concrete, operational levels.

2. SPECIFIC OBJECTIVES

- a. To view the theme of women in the context of the new regional scene, by linking it to the new ECLAC proposal on changing production patterns with social equity, the context of democratization, effective participation in decision-making and complete independence.
- b. Design studies and develop theories to ensure adequate treatment of the gender variable at all levels and implement its incorporation.
- c. Promote the necessary cultural changes for the full recognition of the effective role currently played by women in society.

- d. Ensure the consolidation of the theme of women in institutional terms.
- e. Establish and consolidate coordination mechanisms in order to ensure a common orientation and optimize resources.
- f. Ensure that the information gathered on women, whether from censuses or household surveys, incorporates the recommendations contained in the many studies conducted in the previous period and make the necessary changes to ensure that the information truly reflects women's contribution to the economy.

C. ANALYSIS OF THE ROLE OF EACH OF THE AGENTS INVOLVED: A FEW EXAMPLES

1. The role of the United Nations. The analysis of the role of the United Nations system must be subdivided into several categories: 1.1. Division for the Advancement of Women (DAW), Vienna; 1.2. Working commissions: (Commission on the Status of Women); 1.3. Committees (CEDAW); 1.4. International organizations and their regional headquarters; 1.5. Specialized agencies; 1.6. Funds; 1.7. Regional Commissions. In general, they should carry out the following tasks:
 - a. International coordinating role.
 - b. Establishment of consensus and supervision mechanisms in order to comply with instruments countries have adopted and ratified.
 - c. Promotion of new themes.
 - d. Dissemination of information on progress and obstacles.
 - e. Concrete activities in accordance with specific mandates (UNESCO: education; WHO/PAHO: health; UNICEF: women and children; FAO/IFAD: women in the rural sector; etc.).

Inter-agency regional meetings are expected to be held in order to improve coordination of future programmes.

In this context, ECLAC could play the following role:

- Regional coordination.
- Ensuring the integration of the gender variable into global programmes and policies.
- Further examination and expansion of concrete themes for diagnoses and policies.
- Becoming a focal point for the discussion of the theme of women in the region in terms of both awareness-building, and taking action and disseminating the results.

2. The role of Governments. Consolidating women's bureaus, and incorporating the gender variable into global planning and sectoral policies should at least be considered in determining the role of Governments.
3. The role of non-governmental organizations. This theme should be discussed with regional and national NGOs in an effort to improve the flow of information and explore opportunities for joint action in some areas.
4. The role of women's organizations.
5. The role of the mass media.

D. DISCUSSION OF POTENTIAL NEW THEMES FOR INCORPORATION INTO THE NEW PROGRAMME OF ACTION

Women and poverty
 Women in decision-making posts
 Women and violence

II. PROPOSED WORK METHOD FOR THE ELABORATION OF THE ECLAC PROGRAMME OF ACTION FOR WOMEN IN LATIN AMERICA AND THE CARIBBEAN 1995-2015

1. The proposal for the Programme of Action 1995-2015 should be submitted to the VI Regional Conference in Argentina in 1994 for adoption.
2. The Programme would be elaborated through two complementary mechanisms: Meetings of the Presiding Officers of the Regional Conference and Expert Group Meetings, with the secretariat. In this connection, the calendar of work could be as follows:
 - a. Fourteenth meeting of the Presiding Officers: Analysis and discussion of the proposal. Request secretariat to finetune it. Selection of major topics (June 1992).
 - b. Fifteenth meeting of the Presiding Officers: Discussion of progress in the preliminary outline for the Programme. Guidelines for the Expert Group (November 1992).
 - c. Expert Group meeting. Discussion of one or two substantive topics: the theme of gender in the Programme or one of the specific topics selected. Elaboration of proposals on these topics (November 1992).

- d. Sixteenth and seventeenth meeting of the Presiding Officers, at least one of them to be followed by an expert meeting to continue the discussion of substantive topics (1993).
- e. Eighteenth meeting of the Presiding Officers: Final discussion of the Programme 1995-2015, based on the proposals consolidated by the secretariat, which would be circulated prior to the meeting (first half of 1994).
