AGRICULTURAL STATISTICS - CARIBBEAN
STATISTIQUES AGRICOLES - PAYS DES CARAÏBES
ESTADISTICAS AGRICOLAS - PAISES DEL CARIBE

Volumes X and XI
1993
This represents the update of document LC/CAR/G.361, (Vol. IX 1992), reflecting statistical information up to the year 1991. These tables have been compiled primarily from the returns to a questionnaire sent to the CDCC countries by the CDCC Secretariat. The areas of non-response have been filled in through recourse to the Production Yearbook of the Food and Agricultural Organization (FAO). The increasing incidence of non-response to the survey is an indication of the unavailability of agricultural statistics in the CDCC countries which continue to be significantly agricultural economies with emerging manufacturing and service sectors. The danger of the perpetuation of the present trend is evident. The problem can be confronted at national level by the collection and processing of agricultural statistics as a matter of priority.

This issue of Agricultural Statistics will be the last for some time as the resources previously devoted to its production will be utilized in another area of statistical interest. A number of tables, however, will continue to appear in the expanded "Selected Statistical Indicators".

I take this opportunity to encourage the Agricultural planners at national level to redouble their efforts to ensure the collection, processing and analysis for dissemination of their agricultural statistics. The creation, maintenance and use of a well-designed statistical database on agriculture can only redound to the benefit of the country.

I thank these national institutions that have in the past cooperated with the CDCC Secretariat in the production of this document and look forward to collaboration in the future.

Director
Cette publication correspond à la version actualisée du document Statistiques agricoles: pays des Caraïbes (LC/CAR/G.361), volume IX, 1992 dans lequel sont présentées les données statistiques recueillies jusqu'à 1991. Les tableaux ont essentiellement été élaborés sur la base des réponses apportées au questionnaire que le secrétariat du Comité de développement et de coopération des Caraïbes (CDCC) a fait parvenir aux différents pays membres. Pour les parties de l'enquête restées sans réponse, les données on été extraites de l'Annuaire FAO de production. Le nombre croissant de questions non répondues témoigne de l'absence de statistiques agricoles dans les pays de CDCC dont les économies restent essentiellement tributaires du secteur agricole et caractérisées par un secteur productif et des services encore embryonnaire. Il est évident que la tendance actuelle risque de se maintenir. Pour compenser cette lacune, il faudra, à l'échelon national, considérer le recueil et le traitement des statistiques agricoles comme une tâche prioritaire.

Ce numéro des Statistiques agricoles sera, pour l'instant, la dernière publication du genre car les ressources allouées jusqu'ici à cette activité seront destinées à un autre domaine lié aux statistiques. Plusieurs tableaux seront néanmoins reproduits dans l'édition élargie des Selected statistical indicators of Caribbean countries.

Je saisie cette occasion pour prier les responsables nationaux de la planification agricole de redoubler leurs efforts en matière de recueil, de traitement et d'analyse des statistiques nationales correspondantes en vue de leur divulgation. La mise sur pied, le maintien et l'utilisation d'une base de données judicieusement conçue en matière d'agriculture ne sauraient que bénéficier les différents pays.

Je remercie les institutions nationales du concours qu'elles ont prêté au secrétariat du CDCC dans la publication de ce document et j'espère pouvoir continuer à compter sur leur collaboration.

INTRODUCCION

La presente publicación representa una versión actualizada del documento Estadísticas Agrícolas - Países del Caribe, volumen IX, 1992 (LC/CAR/G.361) y reproduce informaciones estadísticas hasta el año 1991. Los cuadros se han recopilado principalmente a partir de las respuestas dadas a un cuestionario enviado por la Secretaría del Comité de Desarrollo y Cooperación del Caribe (CDCC) a los países miembros del CDCC. Para aquellas áreas de la encuesta en que no se recibieron respuestas se recurrió al Anuario FAO de Producción. El número cada vez mayor de preguntas sin respuesta es un indicio de la no disponibilidad de estadísticas agrícolas en los países del CDCC, cuyas economías siguen siendo predominantemente de carácter agrícola, con incipientes sectores manufacturero y de servicios. El peligro de que se perpetúe la actual tendencia es evidente. El problema puede enfrentarse a nivel nacional mediante la recopilación y el procesamiento de las estadísticas agrícolas como asunto prioritario.

El presente número de Estadísticas Agrícolas será el último que se publicará durante algún tiempo, ya que los recursos anteriormente dedicados a su producción se utilizarán en otra área de interés estadístico. Sin embargo, seguirán apareciendo diversos cuadros en la publicación ampliada Selected Statistical Indicators.

Aprovecho esta oportunidad para alentar a los encargados nacionales de la planificación agrícola a que redoblen sus esfuerzos a fin de asegurar la recopilación, el procesamiento y el análisis de sus estadísticas agrícolas con fines de difusión. La creación, el mantenimiento y la utilización de una base de datos estadísticos bien diseñada sobre agricultura sólo puede redundar en beneficio de los distintos países.

Agradezco a las instituciones nacionales que han cooperado con la Secretaría del CDCC en la producción del presente documento y espero con interés su colaboración en el futuro.

SYMBOLS

- : None, in negligible quantity (less than one half the unit indicated) or entry not applicable

... : Data not available

p : Provisional

r : Revised

e : ECLAC's estimate

Mt : Metric tons

ha : Hectare

kg : Kilogram

No : Number

kg/ha : Kilogram per hectare

n.e.s. : Not elsewhere specified or included

Crop areas : Figures for crop areas generally refer to harvested areas

Production : The production data for a particular crop is presented on the calendar-year basis

Yields per hectare : Yields per hectare are computed from detailed production and area data
Notes on the Tables

Land Use and Irrigation

Data relate to available information at the end of 1987 and may represent the exact land use and irrigation activities at an earlier date. Definitions of land use categories are as follows:

1. **Total area** - refers to total area of the country, including area under inland water bodies (major rivers and lakes).

2. **Land area** - refers to total area of the country, excluding area under inland water bodies.

3. **Arable land** - refers to land under temporary crops, temporary meadows for mowing or pastures, land under market and kitchen gardens and land temporarily fallow or lying idle.

4. **Land under permanent crops** - refers to land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest.

5. **Permanent meadows and pastures** - refers to land used permanently for forage crops, cultivated or growing wild.

6. **Forests and woodlands** - refers to land under natural or planted stands of trees.

7. **Other land** - includes unused but potentially productive land, built on areas, wasteland, parks, roads and any other land not specifically listed under items 3 through 6.

8. Data on irrigation relate to areas purposely provided with water, whether this area is irrigated several times or only once during the year stated.

Table 9 summarises the results of the most recent agricultural census in the Eastern Caribbean countries, Commonwealth of the Bahamas, Belize and the Republic of Suriname.
Table 2 presents estimates of total population, agricultural population and economically active population, total and in agriculture.

These data are generally provided by the countries.

Data relate generally to the present-in-area (de facto) population within the present geographical boundaries.

Agricultural population is defined as all persons depending for their livelihood on agriculture.

Economically active population is defined as all persons engaged or seeking employment in an economic activity.

Economically active population in agriculture includes all economically active persons engaged principally in agriculture, forestry, hunting or fishing.

Gross Domestic Product

The high instability recorded for exchange rates and inflationary trends in some of the Member countries of the CDCC during the last decade, precludes the presentation of the information on GDP in one single currency as in previous issues. Therefore, the related tables show, as up-to-date as possible, data in current national currencies.

TECHNICAL CONVERSION FACTORS

### Citrus

**Belize:**
- 1 box oranges = 40.86 kg
- 1 box grapefruits = 36.32 kg

**Jamaica:**
- 1 box sweet oranges = 38.50 kg
- 1 box grapefruits = 31.70 kg
- 1 box limes = 9.10 kg
- 1 box tangerines = 29.50 kg

### Whole milk

- 1 imperial gallon whole milk = 4.70 kg
- 1 litre whole milk = 0.21997 (imp) gallon

### Eggs

Average weight of 100 hen eggs:

- Trinidad and Tobago = 5.00 kg
- Jamaica = 5.24 kg
- Suriname = 5.50 kg
- Republic of Guyana = 5.50 kg
- Other Caribbean = 5.12 kg

**Superficie des cultures** : Les données de superficie correspondent en général à superficie récoltée

**Production** : Les données de production relatives à une culture se rapportent à l'année civile

**Rendements à l'hectare** : Les rendements à l'hectare sont calculés sur la base des chiffres détaillés de superficie et de production
Notes concernant les tableaux

Utilisation des terres et irrigation

Les données concernant les informations disponibles à la fin de l'année 1987 représentent forcément les activités antérieures en matière d'utilisation des terres et d'irrigation. Les catégories de terres sont définies comme suit:

1. **Superficie totale** - celle du pays, y compris les eaux intérieures (principaux cours d'eau et lacs).

2. **Superficie des terres** - celle du pays moins la superficie des eaux intérieures.

3. **Terres arables** - terres affectées aux cultures, temporaires, ou non, prairies temporaires, faucher ou a pâturer, jardins maraîchers ou potagers et terres en jachères temporaires ou incultes.

4. **Cultures permanentes** - cultures qui occupent le terrain pendant de longues périodes et ne doivent pas être renouvelées après chaque récolte.

5. **Prairies et pâturages permanents** - terres consacrées de façon permanente aux herbacées fourragères, cultivées ou sauvages.

6. **Forêts et terrains boisés** - toutes terres couvertes de végétations naturelles ou artificielles.

7. **Autres terres** - terres non utilisées mais potentiellement productives, terrains bâtis, terres inutilisables, parcs, routes et toutes autres terres n'entrant pas spécifiquement sous les 4 paragraphes précédents.

8. Les données sur l'irrigation se réfèrent aux superficies irriguées qu'elles l'aient été plusieurs ou une fois l'an.

Tableau 9 est un résumé agricole la plus récente effectuée dans la Caraïbe orientale, Bahamas, Bélize et Suriname.
Le Tableau 2 présente, pour la population totale, la population agricole et le population active (total et agricole).

Ces données proviennent généralement des pays.

Les statistiques se rapportent en général à la population dénombrée dans le pays ou territoire à l'intérieur des limites géographiques actuelles (de facto).

Par population agricole, on entend toutes les personnes dont l'agriculture constitue le moyen d'existence.

Par population active, on entend toutes les personnes qui se livrent à une activité économique ou cherchent un emploi.

La population agricole active comprend l'ensemble des personnes occupées économiquement et de manière principale dans l'agriculture, la foresterie, la chasse et la pêche.

Le Produit Interne Brut

L'extrême instabilité observée dans le niveau des taux de change dans certains pays membres du CDCC pendant la dernière décennie ne permet pas de présenter les informations relatives au produit national brut dans une monnaie unique comme dans les éditions précédentes. En conséquence, les tableaux indiquent les données aussi à jour que possible dans les monnaies nationales courantes.

NOTAS EXPLICATIVAS

SIMBOLOS

- : Nada, cantidad insignificante (menos de la mitad de la unidad indicada) o partida no aplicable

... : No se dispone de datos

p : Provisional

e : Estimación de la Oficina de la CEPAL para el Caribe

Mt : Tonelada métrica

ha : Hectárea

kg : Kilogramo

no : Número

kg/ha : Kilogramo por hectárea

n.e.p. : No especificado ni incluido en ninguna otra parte

Superficies de cultivo : Las cifras relativas a superficies de cultivo se refieren generalmente a la superficie cosechada

Producción : Las cifras relativas a producción de cultivos se basan en el año civil

Rendimiento por hectárea : Los rendimientos por hectárea se han calculado a partir de los datos detallados de superficie y de producción
Aprovechamiento de tierras y riego

Los datos corresponden a la información disponible a finales de 1987 y tal vez no representan exactamente el aprovechamiento de tierras y las actividades de riego en una fecha anterior. Las definiciones de las categorías relativas al aprovechamiento de tierras son las siguientes:

1. **Superficie total** - se refiere a la extensión del país en su totalidad, incluyendo la superficie comprendida por las masas de agua interiores (ríos y lagos principales).

2. **Superficie terrestre** - se refiere a la extensión total de las tierras, sin incluir las aguas interiores.

3. **Tierras arables** - comprenden las tierras bajo cultivos temporales, las praderas temporales para corte or pastoreo, las tierras dedicadas a huertas comerciales o pastoreo, las tierras dedicadas a huertas comerciales o huertos y las tierras temporalmente en barbecho o no cultivadas.

4. **Tierras dedicadas a cultivos permanentes** - se refieren a las tierras dedicadas a cultivos que ocupan el terreno durante largos periodos y no necesitan ser replantados después de cada cosecha.

5. **Praderas y pastos permanentes** - se refieren al terreno utilizado permanentemente para forajes herbáceos, ya sean cultivados o silvestres.

6. **Terrenos forestales y montes** - se refieren a las tierras con masas de árboles naturales o plantadas.

7. **Otras tierras** - comprenden las tierras no utilizadas, pero potencialmente productivas, superficies edificadas, terrenos baldíos, parques, carreteras, caminos y cualesquiera otras tierras que no se hayan incluido en los párrafos 3 a 6.

8. Las datos sobre riego se refieren a las superficies a las que voluntariamente se propicia agua, independientemente de si estas superficies son regadas varias veces o
solamente una vez durante el año respectivo.

Cuadro 9 resume los resultados del censo agrícola más reciente en los países del Caribe Oriental, Bahamas, Belice, y Suriname. Las estimaciones de la FAO constituyen un intento de reunir datos, para la superficie total de los países, mientras que los censos sólo se refieren a la superficie de las explotaciones.

Población

El cuadro 2 presenta estimaciones de la población total, la población agrícola y la población económicamente activa, total y en la agricultura.

Por lo general, estos datos son facilitados por los países.

Los datos se refieren, en general, a la población presente (de facto) en las zonas respectivas, dentro de las actuales fronteras geográficas.

La población agrícola se define como todas las personas que dependen de la agricultura para su subsistencia.

La población económicamente activa se define como todas las personas dedicadas a una actividad económica o que buscan empleo en ella.

La población económicamente activa en la agricultura comprende todas las personas económicamente activas que se dedican principalmente a actividades agrícolas, forestales, venatorias o pesqueras.

Producto interno bruto

La gran inestabilidad en el nivel de las tasas de cambio y las tendencias inflacionarias observadas en algunos países miembros del CDCC durante el decenio pasado impiden la presentación de la información relativa al Producto Interno Bruto bajo una sola unidad monetaria como se hacía en ediciones anteriores. Consecuentemente, los cuadros relativos presentan, en monedas nacionales corrientes, los datos de lo más reciente posible.
Superficie

1 hectárea (ha)
1 kilómetro cuadrado (sq.km)
1 kilómetro cuadrado (sq.km)
1 acre
1 milla cuadrada

CO-EFFICIENTES DE CONVERSION

= 2,47109 acres
= 0,38610 milla cuadrada
= 100 hectáreas
= 0,4047 hectárea
= 2,5900 kilómetros cuadros (sq.km)

= 2,20562 libras (lbs)
= 0,98421 tonelada larga (tl)
= 1,10231 tonelada corta (ct)
= 1.000 kilogramos
= 89,214 libras por acre
= 405 kgs/acre
= 0,4536 kilogramo
= 1,01605 tonelada métrica
= 0,90718 tonelada métrica
= 2.240 libras
= 2.000 libras
CO-EFICIENTES TECNICOS

Citrus

Belice:
- 1 caja de naranjas = 40,86 kg
- 1 caja de pomelos = 36,32 kg

Jamaica:
- 1 caja de naranjas = 38,50 kg
- 1 caja de pomelos = 31,70 kg
- 1 caja de limones = 9,10 kg
- 1 caja de mandarinas = 29,50 kg

Leche Entera

- 1 galón (imp) de leche entera = 4,70 kg
- 1 litro de leche entera
  = 0,21997

  (imp) galón
  = 1,0339 kilogramo

Huevos

Pesos promedio de 100 huevos de gallina:

- Trinidad and Tobago = 5,00 kg
- Jamaica = 5,24 kg
- Suriname = 5,50 kg
- Guyana = 5,50 kg
- Otros países del Caribe = 5,12 kg

Central Bank Aruba and Department of Economic Affairs, Commerce and Industry (model estimates), IMF Staff estimates.

Banque Centrale Aruba et Département d'Affaires Économiques, Commerce et Industrie (estimations de modèle), estimations de FMI.

Banco Central Aruba, y Departamento de Asuntos Económicos, Comercio e Industria (estimaciones de modelo), estimaciones de FMI.

<1> Intercompany remittances minus profit taxes and imported inputs, plus local oil deliveries.

<2> Sixty-eight percent of tourism revenues.

<3> Fixed proportion (about 25 percent) of government expenditures, refining and tourism.

<4> Includes: agriculture, manufacturing, financial services and other services and residual items.

<5> 1985 figures not strictly comparable with those for preceding and subsequent years, because of different models used for estimation.
