ECONOMIC COMMISSION FOR LATIN AMERICA
Office for the Caribbean

COMPARISON OF THE
PREFERENTIAL MARGINS IN THE ECCM TARIFF
WITH THE AVERAGE MARGINS PRIOR IN FORCE IN THE REGION

A table prepared for trade policy actions

GENERAL REMARKS

The ECCM Tariff was drafted in such a way as to combine the desire of the ECCM Countries to achieve a modern Tariff fostering their industrial, social and fiscal development with their international contractual obligations, mainly the rule laid down in the Ottawa Agreement to maintain the preferential margins. This solution automatically also conforms with the obligation of GATT ^{1/} not to increase preferential margins, a fact which would become important should the ECCM Countries decide to enter into tariff negotiations within GATT. ^{2/}

This paper contains in tabulated form the old preferential margins and the preferential margins used in the ECCM Tariff in order to show that the preferential situation has on the whole been maintained and that the ECCM Tariff might therefore be rightly considered to be in conformity with the Ottawa as well as the GATT obligations.

^{1/} Abbreviation for "General Agreement on Tariffs and Trade".

^{2/} See Document "Trade Policy Questions related to the Introduction of the ECCM Tariff" ECLA/POS 69/12 of December 1969 and "Considerations Concerning the Foreign Trade Policy of the English Speaking Caribbean Countries" ECLA/POS 71/11 of 27 August 1972.

TECHNICAL REMARKS

Column: ECCM Numbers

The Tariff Items and Sub-items are reproduced in conformity with the printed version of the ECCM (East Caribbean Common Market) Tariff, on which the ECCM Countries base their legislation. It is to be noted that the main headings are fully in conformity with the BTN.

In order to have a short concise Document the description of the individual products is not reproduced, however, the Chapter headings are indicated. Identical sub-divisions of Tariff Numbers are summarised. However, explicit reference is made to "Special Rates", that means, rates where individual ECCM Countries initially retain the right to deviate from the Common ECCM rates. Each country to which a specific rate applies is indicated by the following abbreviations:

- A (Antigua)
- D (Dominica)
- G (Grenada)
- K (St.Kitts)
- L (St.Lucia)
- M (Montserrat)
- V (St.Vincent)

Column: ECCM Duties

This Column contains the general and preferential ad valorem duties provided for in the ECCM Tariff.

Column: Preferential Margins

The Column ECCM Preferential Margin (contains in absolute figures) the difference between the m.f.n. rates and the preferential rates shown in the previous column.

The figure shown in the column "Old Preferential Margins" is - due to the fact that the ECCM Tariff replaces seven Tariffs - not an individual margin but the (arithmetical) average of the previous margins. These average margins were calculated during the drafting of the ECCM Tariff with the assistance of the ECCM Countries. (Instances where it was not possible to measure the preferential margins due to the fact that specific duties were involved are marked by the insertion of an asterisk).
