1. Presentation

The world economy that would emerge after the economic crisis of 2008-2009 is likely to be very different from the one that prevailed until then. This will be due, in part, to the expectation that average world economic growth would be slower than it was during the boom years of 2002-2007; consumption in the United States would diminish as a result of the excessive debt burden of households and the public sector, lower retirement savings and the need for the United States to eventually adjust to its expanding fiscal and current account deficits and the decline in the output of the European Union and the impact this would have on the integration of Central and Eastern Europe. This scenario would most likely be accompanied, in the short run, by reduced tolerance for international migration as governments seek to protect internal labour markets. Since international migration has been a source of remittance receipts for many poor households, this would place increased demands on the limited resources that are available for poverty reduction in the Caribbean.

The new international environment will bring about substantive and long lasting consequences for the Caribbean. Growth patterns observed during previous decades, based on natural resource exports (mainly in Belize, Guyana, Suriname and Trinidad and Tobago) and services (mainly tourism and offshore financial services), are likely to be in question. In response to these anticipated difficulties, the fundamental challenge for Caribbean policy making will be in defining and implementing a path of economic restructuring to create a diversified and growing economy with equity and environmental protection. This will be a difficult process and would require careful guidance since several of the economies confront a number of challenges. Among these are the sustained real exchange rate appreciation (except for The Bahamas), limited fiscal space due to excessive public debt and twin deficits (fiscal and current account) recorded in recent years (except for Suriname and Trinidad and Tobago). In addition, while the investment to GDP ratio of many Caribbean countries is relatively high, the productivity of investment has been generally low.

The small size of local markets imposes the need for Caribbean countries to redouble integration efforts, both within and outside the Caribbean Community (CARICOM). There is urgent need to exploit opportunities within the Economic Partnership Agreement (EPA) between CARIFORUM (CARICOM plus the Dominican Republic) and the European Union, the proposed Free Trade Agreement with Canada and with Central and South America.

The new international situation would be rendered more complex by the need to set targets for adapting to, and mitigating, the already visible impacts of climate change. Caribbean States are extremely vulnerable to the vagraces of climate change as most of their infrastructure and income-generating activities are situated in coastal areas. Increased temperature, changes in precipitation and sea level rise are expected to result in inundation of coastal areas, damage coastal, marine and agricultural resources and result in decreased resilience to extreme events. Anticipated damage to tourism, health and agriculture may well impact significantly on the GDP of Caribbean States, resulting in a reduction in the availability of financial resources for
development as well as a lower standard of living. Concomitant with this would be the threats to 
human security that would place additional strain on finite resources and social infrastructure. 
As well, the cumulative impacts of damage from natural disasters and their economic and social 
costs cannot be ignored, as the situation would be compounded by the greater intensity of 
extreme events resulting in more widespread impacts.

In this context, as the attendant social and environmental problems increase, the 
achievement of the Millennium Development Goals (MDGs) and other Internationally-Agreed 
Development Goals (IADGs) must be pursued in order to create opportunities for reducing 
poverty and inequality as well as strengthen gender equity. The challenge for the subprogramme 
would be to demonstrate that these goals are an integral part of the process of economic and 
social restructuring, identify prevailing resource gaps and propose policy solutions.

The aim of the proposed activities is to contribute to the attainment of the objective of 
the subprogramme in the medium term and to achieve the expected results of a more specific 
nature during the biennium; this will be measured using the indicators of achievement described 
below.

2. Logical Framework of the Subprogramme

<table>
<thead>
<tr>
<th>Expected accomplishment 1:</th>
<th>1.1 Indicator of achievement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strengthened capacities of policy makers from countries in the subregion to formulate, implement and monitor measures to overcome development challenges and promote economic diversification and social transformation</td>
<td>Increased number of government institutions, policy makers and stakeholders from the private sector and academia acknowledging that they benefited from ECLAC’s products and services to promote economic development and social transformation</td>
</tr>
</tbody>
</table>

1.2 Indicator of achievement

Increased number of countries formulating or adopting policy measures in the areas of economic and social development, trade and the environment that take into account ECLAC’s recommendations.
**Expected accomplishment 2:**
Enhanced capacity and technical expertise in countries of the subregion to follow-up on the major international agreements in the economic, social and environmental fields, including follow up to the Mauritius Strategy for implementation of the SIDS Programme of Action.

<table>
<thead>
<tr>
<th>2.1 Indicator of achievement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased number of policies, programmes and measures adopted to follow-up on the major international agreements in the economic, social and environmental fields including follow up to the Mauritius Strategy in line with ECLAC recommendations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>2.2 Indicator of achievement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased number of government institutions and other stakeholders acknowledging that they benefited from ECLAC’s technical cooperation to follow up on the major international agreements in the economic, social and environmental fields, including disaster risk management and follow up to the Mauritius Strategy.</td>
</tr>
</tbody>
</table>

**Expected accomplishment 3:**
Enhanced capacity of Caribbean governments and institutions to promote intra- and inter-regional cooperation and integration.

<table>
<thead>
<tr>
<th>3.2 Indicator of achievement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased number of Caribbean institutions and governments taking action to promote intra- and inter-regional cooperation and integration in line with ECLAC recommendations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>3.2 Indicator of achievement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased number of regional initiatives adopted to promote intra- and inter-regional cooperation and integration reflecting ECLAC’s technical inputs.</td>
</tr>
</tbody>
</table>

3. **Strategy**

Responsibility for the implementation of the subprogramme rests with the ECLAC Subregional Headquarters for the Caribbean, in close coordination with the rest of the ECLAC system. The strategy applied by the subprogramme will focus on continuing to provide technical secretariat services and support to the Caribbean Development and Cooperation Committee.
(CDCC) as a subsidiary body of ECLAC in enhancing its relevance and role in guiding the work of the Subregional Headquarters to assist the countries of the subregion in the follow-up and fulfilment of the Mauritius Strategy to, global conferences. The subprogramme’s efforts will also seek to facilitate the active engagement of countries of the subregion in the follow-up to global conferences and to establish comprehensive frameworks for monitoring, evaluating and reporting on progress made and gaps in the achievement of the MDGs and IADGs.

The ECLAC Subregional Headquarters for the Caribbean will provide effective policy guidance to Caribbean countries and reorient its priorities to better respond to the evolving economic, social and environmental processes that could make the subregion less vulnerable to external shocks. For that purpose, specialized advisory and technical cooperation services will be provided, and workshops and seminars will be held to facilitate horizontal cooperation, networking, sharing of successful experiences in the design of intervention activities that recognize the individual needs of each country and seek to advance common policy solutions. Moreover, priority will be given to the development of frameworks for modelling and projections, as well as support to facilitating monitoring and implementation in various areas of trade, economic and social development. The work programme would also include outputs to address the issues of climate change and natural resource management, including biodiversity preservation. In this regard, priority will be given to strengthening national and regional capacities for monitoring and reporting progress, fostering evidence-based social policy formulation, as well as facilitating cooperation and coordination with other subregional institutions to deliver services and analysis for the Caribbean countries in a coherent manner.

The main users of the outputs of the subprogramme will be the authorities, government officials and technical staff from public institutions of the Caribbean subregion. Other users will include public, private and civil society bodies responsible for the design and management of sustainable development programmes, policies and projects.

The subprogramme will work closely with the Caribbean Community Secretariat (CARICOM), the Caribbean Development Bank, the Caribbean Community Climate Change Centre (CCCCC), and the Secretariat of the Organization of Eastern Caribbean States (OECS) among others. The subprogramme will also continue its collaboration with the United Nations specialized agencies, programmes and funds, in addition to other interested parties, in order to both refine methodologies for population estimates and projections, vulnerability and disaster impacts.

The collaboration with bilateral and multilateral cooperation partners will be enhanced in order to provide additional resources to the subprogramme to strengthen the implementation of its programme of work and maximize its impact in beneficiary countries. Emphasis will be placed in the areas of ageing, gender equality, migration and population mobility, the socio-economic consequences of population dynamics, climate change and disaster risk reduction.

Finally, the division will ensure broad visibility of its work and major achievements through the continuous updating and development of its website and databases, wide dissemination of its main publications and findings in international events and relevant
conferences, as well as participation in key forums involving relevant policymakers, academia and other stakeholders both within and outside the region.

4. **External factors**

The objective and expected accomplishments of the subprogramme will be achievable based on the following assumptions:

(a) The rapport and trust between ECLAC and the key national stakeholders is maintained and strengthened;

(b) The strengthened collaboration and cooperation between regional and international organizations operating in the sub-region which are crucial to the overall success of the subprogramme.

(c) The adverse impact of global threats on the Subregion, including the dynamic social and economic environments, will be limited and will not further undermine the achievement of the expected outcomes of the subprogramme.

5. **List of outputs**

**Subject Area 13.0: Caribbean Development and Cooperation**

1. **Substantive Servicing of Meetings**

   **Intergovernmental meetings**
   (i) One session of the Caribbean Development and Cooperation Committee (CDCC) (high correlation with Expected Accomplishments 1, 2 and 3).
   (ii) One meeting of the Monitoring Committee of the Caribbean Development and Cooperation Committee (high correlation with Expected Accomplishments 1, 2 and 3).

   **Ad-Hoc Expert Group Meetings**
   Caribbean Development Roundtable (one meeting in the biennium) (high correlation with Expected Accomplishments 1, 2 and 3).

2. **Parliamentary Documentation**

   Reports on issues for consideration by the Caribbean Development and Cooperation Committee and the Monitoring Committee (high correlation with Expected Accomplishments 1, 2 and 3).

3. **Recurrent Publications**

   Publication of the Caribbean Development Report (one issue in the biennium) (high correlation with Expected Accomplishments 1 and 2).

4. **Other Substantive Activities**

   (i) Publication of the quarterly bulletin UN Focus on the Caribbean (eight issues in the biennium, in English only) (moderate correlation with Expected Accomplishment 1).
(ii) Semi-annual policy briefs on development issues (four issues in the biennium) (high correlation with Expected Accomplishment 1).

Subject Area 13.1: Economic Development and Integration

1. Substantive Servicing of Meetings

   Ad-Hoc Expert Group Meetings
   (i) Expert group meeting on monitoring progress in the implementation of trade, finance and development cooperation agreements (high correlation with Expected Accomplishments 1, 2 and 3).

   (ii) Expert group meeting on modelling methodologies and practices to guide macroeconomic policies to enhance growth and efficiency while reducing economic vulnerability (high correlation with Expected Accomplishment 1).

2. Recurrent publications
   Annual publication of the Economic Survey of the Caribbean (two issues in the biennium) (high correlation with Expected Accomplishment 1).

3. Non-recurrent publications
   (i) Non-recurrent publication on monitoring progress in the implementation of trade, finance and development cooperation agreements (high correlation with Expected Accomplishment 1).

   (ii) Non-recurrent publication on developing modelling methodologies and practices to guide macroeconomic policies to enhance growth and efficiency while reducing economic vulnerability (high correlation with Expected Accomplishment 1).

4. Training Courses, Seminars and Workshops
   Training course to develop capacity for analysis needed for implementation of the trade, finance and development cooperation agreements (high correlation with Expected Accomplishment 1).

5. Advisory Services
   Provision of technical cooperation and assistance, upon request, to countries on macroeconomic policies and regional integration (high correlation with Expected Accomplishments 1, 2 and 3).

6. Intermediate Activities
   Contributions to the texts of (i) Economic Survey of Latin America and the Caribbean; (ii) Foreign Investment in Latin America and the Caribbean; (iii) Latin America and the Caribbean in the World Economy (PANINSAL); (iv) Preliminary Overview of the Economies of Latin America and the Caribbean (high correlation with Expected Accomplishment 1).
The implementation of operational activities, including training activities, will be subject to the availability of extra-budgetary resources.

Subject Area 13.2: Social Development

1. Substantive Servicing of Meetings

Ad-Hoc Expert Group Meetings
(i) Expert group meeting on population projections and the implication for social safety nets (high correlation with Expected Accomplishment 2 / moderate correlation with Expected Accomplishments 1 and 3).

(ii) Expert group meeting on challenges to social development and the status of monitoring and reporting of the MDGs in the Caribbean (high correlation with Expected Accomplishments 1 and 2).

(iii) Expert group meeting on unpaid work and gender in the Caribbean (high correlation with Expected Accomplishment 2).

2. Non-recurrent Publications

(i) Non-recurrent publication on the current state of population projections and the implication for social safety nets (moderate correlation with Expected Accomplishments 1 and 2).

(ii) Non-recurrent publication on the challenges to social development and the status of monitoring and reporting of the MDGs in the Caribbean (high correlation with Expected Accomplishments 1 and 2).

(iii) Non-recurrent publication on unpaid work and gender (high correlation with Expected Accomplishment 1 / moderate correlation with Expected Accomplishment 2).

3. Advisory Services
Provision of technical cooperation and assistance, upon request, to countries on social, population and gender policies in the region. (high correlation with Expected Accomplishments 1, 2 and 3)

4. Intermediate Activities
Contributions to the text of Social Panorama of Latin America and the Caribbean (high correlation with Expected Accomplishments 1 and 2).

The implementation of operational activities, including training activities, will be subject to the availability of extra-budgetary resources.

Subject Area 13.3: Statistics and Knowledge Management
1. **Substantive Servicing of Meetings**

   **Ad-Hoc Expert Group Meetings**
   (i) Expert group meeting to review findings of statistical surveys in the Caribbean (high correlation with Expected Accomplishments 1 and 2).

   (ii) Expert group meeting to review findings of the recently conducted 2011 round of population and housing censuses in the Caribbean (moderate correlation with Expected Accomplishment 2).

   (iii) Expert group meeting on the Information Society and Knowledge Economy (high correlation with Expected Accomplishment 2).

2. **Non-Recurrent Publications**

   (i) Non-recurrent publication on the analysis and dissemination of the main policy findings of statistical surveys, census and other data gathering exercises in the Caribbean (high correlation with Expected Accomplishment 1 / Moderate correlation with Expected Accomplishment 2).

   (ii) Non-recurrent publication on the Information Society and Knowledge Economy (high correlation with Expected Accomplishment 2).

3. **Other Substantive Activities**

   **Technical materials**
   (i) Updating and maintenance of databases on trade statistics and Selected Statistical Indicators (high correlation with Expected Accomplishment 2 / Moderate correlation with Expected Accomplishments 1 and 3).

   (ii) Updating and maintenance of databases on women and men in decision-making and the Caribbean Millennium Development Goals (CMDG) Info, database on, (MDG Indicator meta data database) (high correlation with Expected Accomplishment 2 / Moderate correlation with Expected Accomplishments 1 and 3).

   (iii) Updating and maintenance of databases on Household Survey Data Sets and the Caribbean Knowledge Management Centre (high correlation with Expected Accomplishment 2 / Moderate correlation with Expected Accomplishments 1 and 3).

   (iv) Updating and maintenance of databases on sustainable development (high correlation with Expected Accomplishment 2 / Moderate correlation with Expected Accomplishments 1 and 3).

4. **Training Courses, Seminars and Workshops**

   (i) Training course on the development of gender indicators and the collection of data on gender (high correlation with Expected Accomplishments 1 and 2).
(ii) Training course on the development and implementation of a Knowledge Management Strategy for the Information Society and Knowledge Economy (high correlation with Expected Accomplishment 1)

5. Advisory Services
Provision of technical cooperation and assistance, upon request, to countries on statistics and national strategies on knowledge economies (high correlation with Expected Accomplishments 1, 2 and 3)

6. Field Projects
   (i) During the biennium, it is expected that a project will be under way on the International Comparison Programme (ICP) (high correlation with Expected Accomplishments 1, 2 and 3);
   (ii) During the biennium, it is expected that a project will be underway on Monitoring of the Caribbean Information Society (high correlation with Expected Accomplishments 1, 2 and 3).

7. Intermediate Activities
Contributions to the data of the following: (i) Economic Survey of Latin America and the Caribbean; (ii) Foreign Investment in Latin America and the Caribbean; (iii) Latin America and the Caribbean in the World Economy; (iv) Preliminary Overview of the Economies of Latin America and the Caribbean; (v) Social Panorama of Latin America and the Caribbean; (vi) Statistical Yearbook for Latin America and the Caribbean; (vii) Demographic Observatory; (viii) Gender Observatory.

   Provision of inputs for ECLAC Databases on ICT and Knowledge Economies Indicators, including integrated follow-up to the WSIS and eLAC Plans of Action (high correlation with Expected Accomplishments 1 and 2).

   The implementation of operational activities, including training activities, will be subject to the availability of extra-budgetary resources.

Subject Area 13.4: Sustainable Development

1. Substantive Servicing of Meetings

   Ad-Hoc Expert Group Meetings
   (i) Expert group meeting on the implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States (high correlation with Expected Accomplishment 2).

   (ii) Expert group meeting on the diversification of the services sector in the Caribbean (high correlation with Expected Accomplishment 1).
(iii) Expert group meeting on new technologies, including energy efficiency and renewable energy technologies, with respect to development and greenhouse gas emissions reduction in the Caribbean (high correlation with Expected Accomplishments 1 and 2).

2. Non-recurrent publications
   (i) Non-recurrent publication on the implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States (high correlation with Expected Accomplishment 2).

   (ii) Non-recurrent publication on the diversification of the services sector in Caribbean countries (high Correlation with Expected Accomplishment 1 / moderate correlation with Expected Accomplishment 2).

   (iii) Non-recurrent publication on new technologies, including energy efficiency and renewable energy technologies, with respect to development and greenhouse gas emissions reduction in the Caribbean (high correlation with Expected Accomplishments 1 and 2).

3. Other Substantive Activities
   Booklets, fact sheets, wall charts, information kits

   Preparation of public education material and information on issues highlighted in the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States, including tourism, energy and climate change (moderate correlation with Expected Accomplishment 2).

4. Advisory Services
   Provision of technical cooperation and assistance, upon request, to countries on policies to promote environmental technologies and disaster-preparedness and risk reduction (high correlation with Expected Accomplishments 1, 2 and 3).

5. Field Projects
   During the biennium, it is expected that projects in the area of review of the economics of climate change will be under way (high correlation with Expected Accomplishment 3).

   The implementation of operational activities will be subject to the availability of extra-budgetary resources.
Annex I

Proposed strategic framework for the period 2012-2013

Programme 17
Economic and social development in Latin America and the Caribbean

Overall orientation

17.1 The overall purpose of the programme is to promote the economic, social and environmentally sustainable development of Latin America and the Caribbean through continuous international cooperation, by undertaking a comprehensive research and analysis of development processes and providing the relevant normative, operational and technical cooperation services in support of regional development efforts.

17.2 The mandate for the programme, which falls within the purview of the Economic Commission for Latin America and the Caribbean (ECLAC), derives from Economic and Social Council resolution 106 (VI), by which the Council established the Commission for the purpose of contributing to and coordinating action towards the economic development of the region and reinforcing economic relationships among the countries of the region as well as world wide. In 1996 through ECOSOC resolution 553 (XXVI) the Commission was entrusted, inter alia, to collaborate with member States in analyzing the development process of formulation, evaluation and monitoring public policies in order to provide operational services on specialized information, advisory services, training and support in regional and international cooperation.

17.3 ECLAC will continue to pursue key objectives shared by all the Regional Commissions, to foster economic integration at the subregional and regional levels, to promote implementation of internationally agreed development goals, including the MDGs, and to support sustainable development by contributing to bridging economic, social and environmental gaps within countries and with the industrialized economies To achieve these objectives, ECLAC will continue conducting and promoting multilateral dialogue, sharing knowledge and networking at the global, regional and subregional levels, and promoting intra-regional and inter-regional cooperation among Regional Commissions and through collaboration with other regional organizations and United Nations Institutions.

17.4 The Commission’s overall strategy for achieving the objectives of the programme is structured around 13 interdependent and complementary subprogrammes implemented through an integrated and multidisciplinary approach. In formulating this biennial plan, the basic guidelines and overarching orientation for the work to be undertaken in the biennium 2012-2013 were drawn from the internationally agreed development goals stemming from the major United Nations conferences and summits in the economic and social fields, including those set forth in the Millennium Declaration and the 2005 World Summit Outcome.

17.5 During 2003-2008, Latin America and the Caribbean benefited from a period of continued expansion, unprecedented in 40 years, during which its countries experienced steady
economic growth and decreasing poverty levels but also improved significant aspects of their macroeconomic management and reduced their external vulnerability. The collapse of the financial sector in industrialized countries, in late 2008, rapidly spread throughout the entire world generating the worst global economic crisis in more than half a century and seriously impacting Latin America and the Caribbean. As a result, the region experienced negative growth in 2009 with Mexico and Central America suffering the harshest costs. The impacts were also strongly felt in social indicators as an additional 9 million people fell into poverty in 2009 while employment conditions worsened and informality grew, affecting the most vulnerable groups such as the poor, women and the young. While various signs of recovery enable the region to fuel the hope that economic growth would resume in 2010, persistent vulnerable conditions in the world economy still shed some sense of caution for the future.

17.6 The crisis has shed light on the structural deficits still hampering the development path of Latin America and the Caribbean countries and has raised questions about their ability to address the most pressing issues and the new realities of the long-term sustainable development agenda. The region’s development patterns in the post-crisis international environment are expected to undergo significant adjustments to adapt to the emerging “new normality” most likely to be characterized by lower levels of economic growth of developing countries, weaker global trade flows with additional barriers to trade, slower growth, more restrictive and selective access to international financial markets, and new labour market dynamics such as “jobless recovery”, and enhanced capacities of governments to mitigate the effects of economic downturns. In terms of competitiveness, the backlogs in innovation and productivity still represent a key obstacle to the success of economic growth-with-equity strategies. Other persistent structural problems such as poverty and its inter-generational transmission, income inequality, regressive tax systems, the effects of rapid demographic change, citizen security and safety, to cite only a few, place additional demands on social public expenditure, social reforms and shared agenda of development among all society actors. Finally, newer global challenges such as climate change and low carbon requirements urgently require the implementation of new strategies to foster adaptation, mitigation and risk reduction as well as to enhance energy efficiency and jump-start the broad use of renewable energies. In the post-crisis context, the role of institutions and markets regulations need to be deeply revised and the role of the State redefined to generate the conditions for a sustainable and inclusive development that would bring the region to a new path of sustainable development with equality.

17.8 In order to meet those challenges, ECLAC will focus the programme of work in the 2012-2013 biennium on the following priorities:
(a) Improving macroeconomic stability and further enhancing policies that reduce vulnerability and mitigate the effects of economic and financial crises;
(b) Strengthening the region’s access to financing for development and enhancing the financial architecture at global, regional and domestic levels;
(c) Increasing the region’s productive potential and reducing productivity gaps to achieve convergence with particular emphasis on innovation and new technologies;
(d) Improving the region’s position in the international economy through trade, regional integration and cooperation;
(e) Promoting a social covenant by improving social equality, reducing social risks and reinforcing gender mainstreaming in public policies;
(f) Enhancing sustainable development policies, energy efficiency and addressing the impacts of climate change;

(g) Strengthening public management to enhance the role of the State in the 21st century; and

(h) Improving institutional building related to the management of global and trans-boundary issues and the provision of public goods at the regional level.

17.9 To this end, the Commission will emphasize analytical, normative, advocacy and capacity-building work to strengthen the design of sustainable development strategies and public policies and to facilitate the continuous monitoring of their practical implementation. Operational services in the areas of specialized information, technical cooperation and training will foster cooperation, networking and sharing of good practices at the subregional, regional and international levels including South-South cooperation. One of the main features of this strategy is the creation of a new subprogramme within existing resources to highlight the essential role of financing for development in regaining and shaping the sustainable growth and development paths particular to the countries of region. The majority of them being considered middle-income economies, they are prone to be increasingly deprived from the benefits of official development aid (ODA) flows while, at the same time, are not fully integrated in international financial markets. Addressing these restrictions will be essential for any viable long-term development strategy at country and regional levels. ECLAC will continue to work on the integrated and comprehensive follow-up to the world summits from a regional perspective, in particular the region’s progress towards the MDGs. For this purpose, the Commission will continue to carry out regional coordination complementing the role of the resident coordinator to enhance UN system-wide coherence. In this line, ECLAC will reinforce its leading role as the convener of the Regional Coordination Mechanism (RCM) of all UN regional specialized agencies, funds and programmes and will promote its active participation in the UNDG. Close collaboration will also be enhanced with the wider UN family institutions including the International Monetary Fund (IMF) and World Bank (WB) as well as with other inter-American, Ibero-American and Bretton-Woods institutions such as the Organization of American States (OAS), The Ibero-American Secretariat (SEGIB), and the Inter-American Development Bank (IADB). At the regional and sub-regional levels, cooperation will be pursued with relevant integration schemes and institutions. ECLAC will also strengthen its collaboration with private sector associations, non-governmental organizations (NGOs), think-tanks and the academic sector to promote policy dialogue and to engage them in the implementation of the sustainable development agenda.

17.10 The Commission will continue to engage with the Executive Committee of Economic and Social Affairs (EC-ESA) as a key global mechanism for ensuring coherence on common thematic areas among entities of the UN Secretariat working in the social and economic sectors.

Legislative mandates
All subprogrammes

General Assembly resolutions

55/2 United Nations Millennium Declaration
57/144 Follow-up to the outcome of the Millennium Summit
57/270 B Integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits in the economic and social fields
58/220 Economic and technical cooperation among developing countries
58/230 Follow-up to the implementation of the outcome of the International Conference on Financing for Development
58/269 Strengthening of the United Nations: an agenda for further change
59/44 Report of the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization
59/57 A Fair Globalization: Creating Opportunities for All — report of the World Commission on the Social Dimension of Globalization
59/146 Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
59/258 Cooperation between the United Nations and the Latin American Economic System
60/1 2005 World Summit Outcome
60/4 Global Agenda for Dialogue among Civilizations
60/188 Follow-up to and implementation of the outcome of the International Conference on Financing for Development
60/204 Role of the United Nations in promoting development in the context of globalization and interdependence
60/215 Towards global partnerships
60/228 Third United Nations Conference on the Least Developed Countries: high-level meeting on the midterm comprehensive global review of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001-2010
61/169 The right to development
61/207 Role of the United Nations in promoting development in the context of globalization and interdependence
61/211 Third United Nations Conference on the Least Developed Countries
61/213 Implementation of the first United Nations Decade for the Eradication of Poverty
