INTRODUCTION

This manual contains information on the dataset compiled from the Survey of Living Conditions and Household Budgets (SLC/HBS) conducted in Saint Lucia by the Kairi Consultants Limited and National Assessment Team between 2005 and 2006. The SLC/HBS is a sample survey which generates data on households and individuals in the country.

This manual was developed by the Economic Commission for Latin America and the Caribbean (ECLAC) – Subregional Headquarters in the Caribbean as a supplementary document for the Caribbean Household Surveys Database (CHSD). It is sectioned out into two main parts: section one provides brief description of the survey and section two contains a concise data dictionary of variables generated from the survey as well as additional variables created by ECLAC. In addition, for ease of reference, an index of all variables in the database is included at the end of the document.

The ECLAC Subregional Headquarters for the Caribbean is pleased to acknowledge the Saint Lucia Central Statistical Office for kindly consenting to the use of their database under the Household Surveys Project. Due recognition must also be given to the Statistics and Economics Projection Division at ECLAC (Santiago) that provided guidance in the standardization of the datasets and the creation of the Caribbean Household Surveys Databank.
