Introduction

This document reports on the outcomes of the implementation of the work programmes of the 16 working groups of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean (ECLAC) for the 2018–2019 biennium, as adopted by the Conference.¹

The information is presented in the form of tables which, for ease of reading, are structured around the programmed activities or final outputs, specifying the period of execution, the degree of execution (completed, in progress or not started) and a percentage of progress thus far as reported by the coordinating body of each working group.

The outputs are also classified into events, documents, methodological tools or dissemination resources. As well as facilitating understanding of the groups' work, this reflects the classification needs of contents in the new website of the Knowledge Transfer Network,² which encompasses the output produced in the framework of the Statistical Conference of the Americas. Available completed outputs corresponding to the current biennium have been published on the new platform.

According to the information received, of the total activities planned for this biennium, 58.2% were completed, 24.3% were in progress at the time of publication of this report, with about 47% complete (simple average), and 17.5% were cancelled or not started. By type of output, 94 are documents (meeting reports, analytical studies and dissemination of findings or working materials and methodologies), 63 are events (meetings, seminars or courses), 17 are media resources (videos, websites, bulletins, and so forth) and 17 are methodological tools (databases, indicator suites, questionnaires).
