242 (AC.57). ACTIVITIES IN THE FIELD OF INDUSTRIAL DEVELOPMENT

The Committee of the Whole of the Economic Commission for Latin America,

Considering that industrialization is one of the most important elements in the economic development of Latin America,

Bearing in mind the studies by the secretariat on the general problems of Latin American industry and on its growth, promotion and financing, together with the analyses made of the basic and dynamic industrial sectors,

Taking into account resolution 1940 (XVIII) of the United Nations General Assembly which, among other things, requests the Secretary-General to initiate consultation with States Members of the Organization, with various international agencies and with the regional economic commissions on the advisability of holding, not later than 1966, an international symposium, preceded by regional and sub-regional symposia, relating to the problems of industrialization of developing countries,

Decides:

1. To take note with satisfaction of the work being done by the secretariat in the industrial field;
2. To welcome the General Assembly's recommendation in resolution 1940 (XVIII) regarding the holding of an international symposium on the problems of industrialization of developing countries;
3. To ask that the secretariat, at the eleventh session of the Commission, to be held in 1965, give special importance to studies of Latin America's problems of industrial development and integration, and that these studies, and the

Commission's discussions on that occasion, should serve the purposes of the regional symposium whose convening is recommended in the said General Assembly resolution;

4. Further to ask the secretariat to increase, as far as possible, the number of industrial sectors under study, and to take due account, in the studies in question, of the essential elements of the regional integration of Latin American industry.
