

UNITED NATIONS

ECONOMIC COMMISSION FOR LATIN AMERICA

ANNUAL REPORT

(30 MARCH 1960 — 15 MAY 1961)

ECONOMIC AND SOCIAL COUNCIL
OFFICIAL RECORDS: THIRTY-SECOND SESSION

SUPPLEMENT No. 4

NEW YORK

200 (IX). Repercussions of scientific progress and regional integration on the economic and social development of Latin America

The Economic Commission for Latin America,

Considering that the rapid advances achieved in the field of scientific research are constantly creating synthetic substitutes for the natural raw materials which have hitherto constituted the basis of the Latin American economies,

Appreciating the progress made in connexion with the peaceful uses of non-conventional energy, the aim of which is to transform the existing systems of production, conversion and distribution of energy, to which sector the Latin American countries devote a very large proportion of their resources,

Bearing in mind that the increasing application of automation in contemporary life is creating a new situation as regards the numbers and training of personnel employed, giving rise to temporary unemployment, or manpower shifts towards services, or the absorption of the younger population groups by the extension of their period of education,

In view of the need to co-ordinate Latin American economic integration efforts with similar efforts being made in the European and African countries, creating common markets which are bound to affect one another and whose repercussions may be felt by the economy of our countries,

Decides to recommend to the ECLA secretariat that, with the co-operation of the ILO, FAO, BTAO, UNESCO and the International Atomic Energy Agency, it carry out research, on a continuing basis in so far as its resources permit, on the future repercussions of scientific progress, the development of the non-conventional forms of energy, automation and the integration of other areas, on the economic and social development of Latin America.

13 May 1961

201 (IX). Consumer goods industries

The Economic Commission for Latin America,

Considering that on various occasions, and particularly in resolution 10 (IV), the Commission expressed its interest in studies connected with consumer goods industries, including the textile industry which occupies a prominent place in that group,

Considering that a thorough knowledge of the characteristics of these industries in the various countries of the region acquires particular importance when related to regional problems of economic integration,

Takes note with satisfaction of the fact that the secretariat has embarked on new studies on the textile industry in some countries of the region in response to requests made by institutions in those countries,

Recommends to the secretariat that it extend such studies to other countries of the region which have expressed interest in the matter and also to other industries in the group of consumer goods industries,

Requests the United Nations Bureau of Technical

Assistance Operations and FAO to collaborate in this project by providing experts in these branches of industry who have previously taken part in missions in individual countries of the region.

13 May 1961

202 (IX). Pulp and paper industries

The Economic Commission for Latin America,

Considering the work accomplished by the ECLA/FAO/BTAO Pulp and Paper Advisory Group in studying the prospects of developing the pulp and paper industries in Latin America,

Considering the usefulness of such studies, not only for the countries directly concerned, but also as background information essential for the adoption of a regional approach to the development of those industries,

Considering the need for pursuing such studies not only as regards bringing them up to date in the countries where this is necessary but also in respect of supplementing them with an analysis of other fundamental aspects of the development of the industries in question, such as the training of personnel, technological research for the more efficient adaptation of conventional processes to the special characteristics of Latin American raw materials, the international financing of new plants, etc.,

Considering the desirability of directing the activities of the above-mentioned Advisory Group towards the provision of assistance to Governments, whenever requested, in the preparation of specific development programmes for industries in the sector or in formulating applications for international technical and financial assistance in the preparation of such programmes from such organizations as the Special Fund,

Decides :

1. To recommend to Governments that they continue to utilize the services of the Group ;

2. To request the secretariat to take the necessary steps to enable the Group to continue its useful activities in Latin America ;

3. To request that the Bureau of Technical Assistance Operations and the Food and Agriculture Organization of the United Nations continue to co-operate with the secretariat in constituting the Group ;

4. To recommend to the secretariat that the future activities of the Group be primarily concerned with providing assistance to Governments which so request, in the preparation of specific programmes for the development of the pulp and paper industries in their countries and in clarifying the problems of training and technological and financial research to which the implementation of such programmes may give rise, in co-operation, on the technological side, with the Regional Institute for Forest Research at Merida (Venezuela).

13 May 1961

203 (IX). Technological research

The Economic Commission for Latin America,

Considering the disparity between Latin America's
