CARIBBEAN PATENT INDEX

Preface

This publication is an output from the project "Patents: Technological Information Caribbean" financed by the International Development Research Centre (IDRC), Ottawa and executed by the Economic Commission for Latin America and the Caribbean (ECLAC), Port-of-Spain.

It covers patents registered in Barbados, Guyana, Jamaica, St. Lucia and Trinidad and Tobago.

Because of problems in obtaining documents from the offices where patents are registered further supplements will have to be published in an attempt to produce an index containing patent documents from all participating countries.

Patent documents are a source of valuable information.

From an index, such as the Caribbean Patent Index (CPI) information on who owns patent rights in a technology, where these rights are upheld, and for how long may be important for matters of trade and/or industrial development.

It may also be a good indication of the industrial activity of a country since the patents applied for and granted will in most cases show the area of commercial interest.

SAMPLE RECORD

Priority Country Code, number, and year

Date on which patent was granted in country

BARBADOS (BB) ISO Country Code

Patent Registration Number

Reregistered Patent, usually having
a United Kingdom equivalent
