FOREWORD

ACKNOWLEDGEMENT

SECTION A:	CARIBBEAN SIDS AND THEIR VULNERABILITY	
A.1	Introducing vulnerability.....	1
A.2	The coastal zone – risks, hazards and vulnerability.....	5
A.3	Land use planning and vulnerability assessment.....	28
SECTION B:	THE ECLAC METHODOLOGY	
B.1	An introduction to the ECLAC methodology for SIDS.....	43
B.2	Key concepts and definitions.....	53
SECTION C:	APPLYING THE METHODOLOGY	
C.1	The affected population.....	59
C.2	Infrastructure (Transportation, essential services, communication).....	78
C.3	Coastal areas and infrastructure.....	88
C.4.a	Terrestrial environments: Assessment of disaster impacts.....	111
C.4.b	Marine environments: Assessment of impacts.....	128
C.5	Tourism.....	135
C.6	Agriculture and fisheries.....	150
C.7	The manufacturing and commercial sectors.....	161
C.8	The social sector.....	195

SECTION D:	PULLING IT ALL TOGETHER – SUMMARY OF EFFECTS	
D.1	Overall effects of damages on the economy of the affected country	216
SECTION E:	BUILDING A FRAMEWORK FOR VULNERABILITY REDUCTION	
E.1	Planning for vulnerability reduction	246
E.2	Coastal engineering: Reconstruction – Management and mitigation.....	271
E.3	Social sector dynamics	279
E.4	Project development for vulnerability reduction	292
E.5	Actions at the community/national level to reduce vulnerability	299
E.6	Building capacity for vulnerability reduction – Institutional options for disaster management agencies.....	305
SECTION F:	MANAGING THE PROCESS – OPERATIONAL ASPECTS	
F.1	Information management	324
F.2	Operational logistics	332
SECTION G:	A GENERIC OUTLINE FOR REPORTS.....	342
GLOSSARY	349
ANNEX 1	Case Study.....	358
ANNEX 2	Selected Exercises.....	383
